

Vijuksama Hongthongdaeng

Infrastructure & Full-Stack Engineer

Samut Prakan, Thailand 061 576 6142 vijuksama@gmail.com www.vijuksama.com github.com/NsamaX

SUMMARY

Self-taught engineer and the sole IT for a 230-person manufacturing site — I built the company's entire tech backbone from two repurposed desktops: server infrastructure, networking, security, and in-house ERP software, using open-source and AI to ship reliable systems on a near-zero budget.

SKILLS

Infrastructure, DevOps	Proxmox VE/PBS · Docker · Linux · Nginx Proxy Manager · WireGuard · Tailscale · Cloudflare · n8n · OpenMediaVault
Networking	Load Balancing · IP / Subnet Planning · AdGuard DNS
Security	Wazuh · Defender
Development	React · Next.js · TypeScript · PostgreSQL ·
Tools	Figma · Git · PowerShell · AI-Driven Development
Languages	Thai (Native) · English (Normal)

EXPERIENCE

Nozomi Enterprise (Thailand) Nov 2025 — Present

Sole IT · Infrastructure, DevOps & Development

- Built the company's on-premise infrastructure from scratch on two repurposed desktops — a Proxmox VE + PBS cluster running 7+ virtualized services (NAS, reverse proxy, DNS, VPN, monitoring) with automated nightly backups and near-99% uptime.
- Redesigned the factory network for ~230 staff and 60+ devices: dual-WAN load-balancing + failover, a structured /24 IP plan, and WireGuard / Tailscale remote access.
- Cut recurring IT costs 45,200฿/year by self-hosting open-source replacements (OpenMediaVault, Wazuh + Defender), and automated daily ops for 50 workstations with PowerShell + RMM into centralized dashboards.

SELECTED PROJECTS

ERP System — BOM Module

In-house ERP replacing fragmented per-department Excel sheets. The Bill-of-Materials module unifies product structure, raw materials, and inventory cost into one role-based, always up-to-date source of truth.
Next.js · PostgreSQL · Docker

Massage Administration System

Web app for managing parlor operations with role-based access — appointment scheduling, staff profiles, service management, and monthly revenue reports.
Next.js · PostgreSQL

Nexus

Personal crypto trading bot for Binance with full-auto and hybrid modes — real-time WebSocket updates, AI-powered news analysis, and a REST API.
TypeScript · Python

EDUCATION

B.Sc. Information Technology 2021 — 2025

Silpakorn University, Faculty of Science — thesis: NFC TCG Deck Tracker (Flutter)
